A 3D histogram plot showing a distribution. The vertical axis (y-axis) ranges from 0 to 1.4 with major ticks every 0.2. The horizontal axis (x-axis) ranges from 0 to 20 with major ticks every 2 units. The depth axis (z-axis) ranges from 0 to 10000 with major ticks at 5000 and 10000. The plot shows a sharp peak at low x and z values, with a long tail extending along the z-axis. The peak height is approximately 1.4. The tail extends to z=10000, with the height decreasing as z increases. The plot is labeled 'CMS' and 'preliminary simulation'.
