A 3D histogram plot showing a distribution. The vertical axis (y-axis) is labeled with values 0, 0.02, 0.04, 0.06, 0.08, and 0.1, with a multiplier of $\times 10^{-3}$ at the top. The horizontal axis (x-axis) is labeled with values 4, 6, 8, 10, 12, 14, 16, 18, and 20. The depth axis (z-axis) is labeled with values 5000 and 10000. The plot shows a sharp peak at low x and z values, with a long tail extending along the z-axis. The peak height is approximately 0.1 $\times 10^{-3}$ at x=4 and z=5000. The distribution is rendered in a 3D perspective view with solid black lines for the edges and dotted lines for the hidden edges.
